RFID Your Way

Anytime Library

The FE Technologies Anytime Library is a standalone library item dispensing module that allows you to offer your library patrons the ability to borrow anytime!

It's ideal for use in foyers, train stations, hospitals, schools and other public areas where 24/7 access to library items is required. The unit is robust and designed for unattended use – its simple design avoids expensive robotics and troublesome maintenance requirements. All you need to do is replenish the stock of the unit. A range of reports is also available.

The Anytime Library has a large capacity of 336 library items and uses a unique panoramic carousel system to allow patron browsing. An intuitive and simple to use touchscreen guides the patron through the borrowing process. Patrons can borrow or return items by scanning their library membership card – the unit communicates with the library's Library Management System (LMS) so all borrowing rules and patron privileges are followed. A receipt for both issues and returns is provided.

Returns items are automatically slotted into the best location.

Book size limit: 195 X 271mm, 5-30mm thick.

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
